

HYOSUNG

MX8200QT

The future of a small footprint, full function, high capacity, recycling ATM is already here. The **MX8200QT** was designed to not only move more teller transactions to a more cost effective channel but to also fit the changing branch and off premise formats. The **MX8200QT** enables customers to choose how they want to interact with your institution by offering a more robust set of transactions through Hyosung's industry leading core integration; autonomously or with the assistance from branch staff or on demand video assistance.

KEY FEATURES

INNOVATION

Small, compact footprint cash recycler that can be deployed anywhere. Full function deposit capability enables financial institutions to extend their presence and deliver convenience to consumers. High capacity, cash recycler module creates efficiencies within the cash cycle.

CAPACITY

High capacity, cash recycling capability and multi-check function. High capacity allows for denomination selection.

FUNCTIONALITY

Delivers transactions via both self-service or video assistance. The small footprint enables a wide variety of placement possibilities including new markets. The **MX8200QT** allows for an unparalleled range of transactions types outside the traditional branch space when deployed with Hyosung's innovative core integrated software and powerful video assistance solutions.

HIGHEST AVAILABILITY

Innovative design and the use of Hyosung manufactured core technologies allows for fast, easy replenishment and reduced downtime. The **MX8200QT** is designed to provide reliability that is unequalled in the market, with minimum maintenance and maximum uptime.
